

## Appendix C – expected additional production

1 Was EITE ACTIVITY carried on at SITE during the 2011 year?

Yes

No

2 Is there equipment which has been or will be installed or recommissioned at SITE to carry on EITE ACTIVITY?

Yes

No

3 Please describe the equipment, and also provide information about each of the following:

- a) When the equipment was first fully installed (or when it is expected to be installed, or substantially installed);
- b) How the equipment will increase the quantity of each relevant product which is directly affected by the use of the equipment in the 2011/12 financial year;
- c) Whether, after the equipment is installed or recommissioned, any other equipment is to be decommissioned or operated at a lower rate.

*Please provide information as an attachment if insufficient space below.*

4 Please complete the below table in relation to any relevant product the quantity of which is expected to increase in the 2011/12 financial year and which is directly affected by the use of the equipment:

	Type of relevant product	Quantity referable to SITE for 2010/11fy	Quantity reasonably likely to be referable to SITE for 2011/12fy	
Relevant product 1				tonnes <input type="checkbox"/> kilolitres <input type="checkbox"/>
Relevant product 2				
Relevant product 3				
Relevant product 4				
Relevant product 5				
Relevant product 6				
Relevant product 7				

5

Please complete the below table in relation to the maximum productive capacity of all the equipment that is to be used to produce each applicable relevant product:

	Maximum productive capacity before the installation or recommissioning of equipment* (tonnes/kilolitres)	Maximum productive capacity after the installation or recommissioning of equipment** (tonnes/kilolitres)	Increase (%)
Relevant product 1			
Relevant product 2			
Relevant product 3			
Relevant product 4			
Relevant product 5			
Relevant product 6			
Relevant product 7			

\* Excluding decommissioned equipment that exists at SITE and that has not been used since the equipment was installed, and is not proposed to be used until at least 2014.

\*\* As determined after the equipment is commissioned and any existing equipment that is to be decommissioned has been decommissioned.

6

Please provide information about each of the following:

- a) Any contracts or other arrangements that have been entered into to buy the output of EITE ACTIVITY (you do not need to provide the price of the output);
- b) The commissioning or recommissioning of the principal equipment that is to be used to carry on EITE ACTIVITY (including a description of when and how the equipment will be constructed, commissioned or recommissioned);
- c) The arrangements that are in place to finance the installation of any equipment at SITE (in general terms);
- d) Any factors of which you are aware that would stop or delay the carrying out of EITE ACTIVITY or the installation of any equipment at SITE.

Please provide information as an attachment if insufficient space below.

7

Please attach a statement by the person constructing the principal equipment that is to be used to carry on EITE ACTIVITY as to whether the equipment:

Attached

- i) will be constructed as described in the application; and
- ii) is likely to be ready to produce the relevant product.
